

ABSTRACT OF THE DISCLOSURE
LOW-DETECTABILITY COMMUNICATION
BETWEEN A TRANSMITTER AND RECEIVER

A method for low-detectability communication between a transmitter and receiver is provided. The method including: transmitting first data from the transmitter according to at least one of a first timing, modulation, and frequency; appending the first data, prior to transmission, with information regarding at least one of a second timing, modulation, and frequency for a subsequent transmission; and transmitting second data from the transmitter according to the information.
